IDENTIFIERS	*Alabama

ABSTRACT

A report on the Alabama Student Grant Program, a state grant-in-aid program for Alabama residents attending certain independent institutions in the state, summarizes program history and activity, describes program eligibility requirements, indicates the institutional distribution of grants, and ranks the fields of study pursued by grant recipients. The distribution of grants among subject fields, including dollar totals and average grant amounts, is also tabulated separately for each of the 13 participating institutions. During the 1987-88 academic year, the number of grant recipients ranged from a low of 16 at one institution to a high of 1,337 at another. A majority of grant recipients majored in business administration (39%), general liberal arts and sciences (16.5%), or education (7.5%). About 5% majored in a technological or occupational program at the associate or sub-baccalaureate level. The proportion of recipients enrolled in a technical-health area more than doubled during this year. (MSE)

INTRODUCTION

The Alabama Student Grant Program (ASGP) is a State grant-in-aid program for students who are bonafide residents of Alabama for undergraduate attendance at certain independent, nonprofit Alabama postsecondary educational institutions. Created by Act 90 during the Second Special Session of the 1978 Legislature, the program is made possible by a direct appropriation of funds by the Legislature of the State of Alabama.

Until the 1985-86 academic year, the appropriation for the Alabama Student Grant Program was $3 million each year. For the 1985-86 academic year, the appropriation was $3,342,956; for the 1986-87 academic year, the appropriation was $3,016,828; and for 1987-88, the appropriation was $3,017,528.

According to Act 90, any students enrolled in independent, nonprofit colleges or universities which receive a direct appropriation during the fiscal year from the State of Alabama are specifically restricted from participation in the Alabama Student Grant Program. (Since 1978-79, these institutions have included Marion Military Institute, Talladega College, and Tuskegee University.) The Act further designated the Alabama Commission on Higher Education (ACHE) as the administrator of the Program and directed the agency to establish the operating procedures and regulations.

ACHE approved operating procedures and regulations for the Alabama Student Grant Program on October 13, 1978. These regulations specified that maximum academic year awards, up to $600, will be determined by the number of applicants in the program.

In the initial year, grant payments totaling $2,688,260 were issued to 6,247 eligible grant recipients at 16 approved institutions within the State of Alabama; maximum grant awards per student were $550. In the second year, grant payments totaling $2,960,752 were issued to 6,768 eligible recipients at 12 approved institutions; maximum grant awards were $564.

In the third year, grant payments totaling $2,677,685 were issued to 7,271 eligible recipients at 11 approved institutions; maximum grant awards were $504. In the fourth year, grant payments totaling $3,184,417 were issued to 7,381 eligible recipients at 11 approved institutions; maximum grant awards were $570.

In the fifth year, grant payments totaling $2,683,710 were issued to 7,462 eligible recipients at 14 approved institutions; maximum grant awards were $468. In the sixth year, grant payments totaling $3,241,100 were issued to 7,841 eligible recipients at 13 approved institutions; maximum grant awards were $540.

In 1984-85, the seventh year of the program, grant payments totaling $2,946,811 were issued to 7,580 eligible recipients at 14 approved institutions; maximum grant awards were $507. In the eighth year of the program, 1985-86, grant payments totaling $3,342,200 were issued to 7,266 eligible recipients at 13 approved institutions; maximum grant awards were $600. This marked the only year to date that the grant program has been fully funded.

In the ninth year of the program, 1986-87, grant payments totaling $2,812,968 were issued to 6,957 recipients at 13 approved institutions; maximum grant awards were $516. In the tenth year, 1987-88, grant payments totaling $3,103,626 were issued to 6,945 recipients at 13 approved institutions; maximum grant awards were $570.

Grant funds are sent to students as monies are released by the state. Currently, the state releases funds in four, equal, quarterly disbursements. The order in which institutions are issued Fall term checks on behalf of students is determined by a random and public drawing of institutional names, with first-drawn/first-paid to last-drawn/last-paid. Checks for second term are issued in reverse order -- last drawn/first-paid to first-drawn/last-paid. Checks for Spring quarter are issued in the same order as Fall term.

Each year a portion of the legislative appropriation is used by the agency for the administration of the program. Less than 2% of the appropriation was used for operating expenses in 1987-88. Remaining funds are reverted back to the Alabama Special Education Trust Fund. In 1987-88, $44.17 was reverted back to the Trust Fund.

During the 1987-88 academic year, the number of grant recipients ranged from a low of 16 at Southeastern Bible College to a high of 1,337 at Birmingham-Southern College. The median number of recipients per institution was 417, and the mean number of recipients was 534.

This past year also saw a majority of all grant recipients majoring in business administration, general liberal arts and sciences or education. Over one-fourth of all grant recipients majored in a business administration program. Over one-sixth of all grant recipients majored in liberal arts and sciences. Nearly one-thirteenth of all grant recipients majored in education.

Additionally, a total of 411 students, or 5.07% of all grant recipients, majored in a technological or occupational program at the associate degree or sub-baccalaureate level. A total of 235 students, or 2.90% of all grant recipients, majored in a technical-health area. During the previous year, less than 1% of the grant recipients were enrolled in this type of program.

Although the Alabama Student Grant Program has now completed its tenth year, a decade of viability was marked by a shaky beginning. During the first year of operation, the legality and constitutionality of the program was challenged in the courts. However, the program was declared constitutional on its face by the Montgomery Circuit Court. This decision was upheld by the Alabama Supreme Court.

Additionally, support for the program was strengthened with the adoption of Act No. 89-399 (sponsored by **Representatives Roy Johnson and Mary Zoghby** in the House and **Senator Ryan DeGraffenried** in the Senate) in the 1989 regular session of the Alabama Legislature. This Act provides that the allowable limits of appropriations per student be raised from $600 to $1200. Though there have been no additional funds provided, there is optimism for future expansion of the program.

STUDENT ELIGIBILITY REQUIREMENTS

Alabama Student Grant Program awards are limited to bonafide residents of the State of Alabama for undergraduate, nonsectarian, secular education at certain independent, nonprofit postsecondary educational institutions of higher education located within the State of Alabama. In order to be eligible for consideration for an ASGP award, an applicant must meet the following criteria:

(1) Have obtained a certificate of graduation from a secondary school, or have obtained the recognized equivalent of such graduation;

(2) Be classified as an undergraduate student;

(3) Be an Alabama resident as defined in Act No. 90, Acts of Alabama, Special Session 1978, the Alabama Student Grant Program;

(4) Be a citizen of the United States, or be in the process of becoming a citizen of the United States;

(5) Be enrolled as a full-time or half-time student in an eligible program in an approved institution;

(6) Be making satisfactory academic progress; and,

(7) Not be enrolled, or intend to enroll, in a course of study leading to an undergraduate degree in theology, religion, or other field of preparation for a religious vocation.

INSTITUTIONAL DISTRIBUTION

In order for an Alabama resident to receive an ASGP award, the recipient must be enrolled in a nonsectarian, secular educational program of at least six months duration and which has been approved by the Alabama Commission on Higher Education. An eligible program must be offered at an institution approved by ACHE for student participation in the Alabama Student Grant Program.

In order to be considered an approved institution, the institution must be independent, nonprofit, postsecondary educational institution located within the State of Alabama and meet the following criteria:

(1) be accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS), or if it is not so accredited, be classified in an exemption status and be licensed to operate in the State of Alabama by the Private School Unit of the State Department of Education, and be in the formal process of attaining accreditation by SACS, or be an institution whose credits are currently accepted, on transfer, by at least three (3) other institutions which are accredited by SACS within Alabama.
(2) file a signed agreement with ACHE to comply with all regulations and procedures of the ASGP;
(3) have an academic curriculum which is not comprised principally of sectarian instruction or preparation of students for a sectarian vocation;
(4) not award primarily theological or religious degrees;
(5) perform essentially secular educational functions which are distinct and separable from religious activity;
(6) not discriminate in its admission practices on the basis of religious or denominational preference;
(7) not receive a direct institutional appropriation for the fiscal year from the State of Alabama.

All 13 institutions approved by ACHE had ASGP applicants for the 1986-87 academic year. These institutions are included in Table I. Also listed by institution in this table are the number of grant recipients, the percentage of total grant recipients, the number of payments made to students, the number of payments returned, and the total dollar amount of grants received.

The number of grant recipients ranged from a low of 16 at Southeastern Bible College (Birmingham) to a high of 1,337 at Birmingham-Southern College. The median number of recipients at the institutions was 417, and the mean number of recipients was 534.

TABLE I

DISTRIBUTION OF GRANT RECIPIENTS AND PAYMENTS BY INSTITUTIONS

Institution	Number of Grant Recipients	Percentage of Grant Recipients	Number of Payments Received	Amount of Grants
Birmingham-Southern College	1,339	19.04%	2,569	$ 634,630
Concordia College	417	5.93	635	179,730
Faulkner University	1,208	17.17	2,197	416,693
Huntingdon College	537	7.17	866	226,905
Judson College	246	7.63	453	126,030
Miles College	398	3.50	641	174,060
Mobile College	522	5.66	895	234,990
Oakwood College	75	1.07	198	37,416
Samford University	1,285	18.27	2,225	594,855
Selma University	58	.81	100	28,290
Southeastern Bible College	19	.28	28	6,225
Spring Hill College	384	5.46	698	177,432
Stillman College	546	7.76	940	266,370
TOTALS	6,034	100.00%	12,445	$3,103,626

FIELDS OF STUDY PURSUED BY STUDENT

Grant recipients majored in 28 different course program areas as outlined in the HEGIS Taxonomy of Subject Areas. The HEGIS Taxonomy (Higher Education General Information Survey course classification system) was developed in 1970 by the National Center for Education Statistics (NCES) and allows users to describe academic subject areas associated with instructional offerings.

Table II, Rank Order Listing of Numbers and Percentages of Grant Recipients by Program Areas, includes the course program areas of grant recipients, the number of grant recipients per course area, and the percentage of grant recipients enrolled in each course program area. The 8,100 total number of grant recipients in all course program areas represents the total headcount enrollment in all subject areas.

More than one-fourth, 39.36 percent, of all grant recipients majored in a business administration program. Subject classifications included accounting, business, business administration, finance, economics, and secretarial science. About one-sixth, 16.54 percent of all grant recipients, majored in general liberal arts and sciences. This category included all students enrolled in a general liberal arts and sciences curriculum, as well as those students who had not selected a major course of study.

Nearly one-thirteenth, 7.52 percent, of all grant recipients, majored in education. Subject classification included art education; business education; early childhood education; education, elementary education; general science--education; health, physical education, and athletics; mathematics education; music education; psychology--education; and secondary education.

Nearly one-seventeenth, 5.42 percent, of all grant recipients majored in a social science program area. Subject classifications included social science, history, political science, economics, sociology, and international relations. During the previous year, 5.79 percent of all grant recipients majored in a social science program area.

Over two-thirds, 63.42 percent, of all grant recipients majored in business administration, general liberal arts and science, or education.

About one in every twenty-six recipients, 3.89 percent majored in a nursing program. Over half of the nursing students were in an LPN or LVN curriculum, and nearly half of the students were enrolled in a baccalaureate degree nursing program.

All the program codes at the 5000 and above level are technological and occupational curricula below the baccalaureate degree level. The institutions having such curricula included Faulkner University, Mobile College, Samford University, and Selma University. A total of 411 recipients, or 5.07% of all grant recipients, majored in a technological or occupational program at the associate degree or sub-baccalaureate level.

TABLE II

RANK ORDER LISTING OF NUMBERS AND PERCENTAGES OF GRANT RECIPIENTS BY PROGRAM AREAS

Program Area	Program Code Level	Number of Grant Recipients	Percentage of Grant Recipients
Business Administration	500	3,188	39.36%
General Liberal Arts and Sciences	4900	1,340	16.54
Education	800	609	7.52
Social Sciences	2200	439	5.42
Biology	400	377	4.65

TOTALS		8,100	100.00%

INTRA-INSTITUTIONAL DISTRIBUTION OF GRANT AWARDS

Tables III through XV list the numbers of grant recipients enrolled in the various approved programs at each of the approved institutions. Also included by course program areas are the numbers of payments received, the number of payments returned, the total payments, and the average payments per student.

Maximum grant awards for 1987-88 were $570. To receive a maximum grant, a student had to be enrolled as a full-time student for the entire academic year at an approved institution (or institutions). Any student who enrolled for less than a full-time load, but at least a half-time load, or who was enrolled for less than the entire academic year, received less than the maximum grant award for the year.

Payments were issued to students on a per term basis--i.e., full-time students enrolled at an institution on the semester system received two payments during the year ($270 first term, and $300 second term), and students enrolled at an institution on the quarter system received three payments ($180 first term, $270 second term, and $300 third term). The total dollar amount of payments per program area, therefore, was dependent upon the number of students enrolled in the program area, the full- or half-time status of the students, and the number of terms the students were enrolled.

Column 5-6 of Tables III through XV lists by program areas the average payment per student. Each average payment figure was derived by dividing the total dollar amount of payments per program area (Column 5) by the number of grant recipients per program code (Column 3). The average payment per student in any program area was less than the $570 maximum payment for 1987-88 when any of the grant recipients in the program area attended the institution for less than the academic year, or enrolled for less than a full-time load for any term(s) during the academic year.
